

ANARCHY IN SCANDINAVIA.

LAMP COLLECTION 2023-24

 HOUSE OF
HOLMEDAL

A new maker of lights and interior products.

ABOUT HOUSE OF HOLMEDAL

The product starts with a story or function that is conveyed through the choice of materials, design language and a conscious amount of light, says Holmedal, and continues:

It is about having respect for the material and not make things too complicated. I want the lamps to be decorative and trigger emotions, but at the same time be simple enough to bring out the materials and surface reflections in the form.

Proximity and honesty to production is important. Everything is carefully executed in mouth-blown glass according to old Scandinavian traditions. Colours and shapes are developed through numerous hours of testing and development creating reflections and colour combinations only the magic of handmade glass can create. Our favorite metal is brass and we stick to the real deal without any compromises.

Our brand was founded in Norway in 2021 and the first lamp collection was launched in the fall of 2022. We want to fill the house with thrilling products the coming years. Welcome to our Scandinavian anarchy.

Anders Holmedal /
Founder and Creative Director

“A pretty and innovative lamp is more than thrilling shapes.”
